Billing conditions

Determining weight for preferred and standard periodicals.

The shipment charges are generally based on weight. For POSTVERTRIEBSSTÜCK items (preferred periodicals) charges are also based on the frequency of publication. The weight is determined as follows on the basis of the sample copy, including wrapping and all other components of the item. Weight band ranges in increments of 10g have been defined to determine the shipment charge due. Weight bands and prices can be found in the price tables for POSTVERTRIEBSSTÜCK (preferred periodicals) and PRESSENSENDUNG (standard periodicals) items. Invoices and payment slips for the subscription fee of the carrier object and objects with a height of 3 to 30mm will be billed at an additional charge. For insert prices see page 8. The commercial rounding rules will be applied when determining the dimensions to be billed:

- Dimensions of 0.5mm and over will be rounded up, dimensions less than 0.5mm will be rounded down.

Price differentiation according to tariff zones.

The charges for standard POSTVERTRIEBSSTÜCK (preferred periodicals) and PRESSENSENDUNG (standard periodicals) items destined for conurbations will be reduced by 25% and increased by 8% for rural areas. The shipment charges will remain unchanged in the intermediate zones. This generally applies if the following conditions are met:

1. The average circulation dispatched by mail per issue number of a title was at least 100,000 items in the past six months.

2. While using the price differentiation into tariff zones, at least 100,000 items per number must be posted.
3. Complete electronic data records to announce the posting will be transmitted as the basis for billing for the title concerned.

If you require further information concerning the price differentiation procedure, your Deutsche Post customer adviser will be happy to assist you.

The invoice.

An invoice is produced for each posting, including partial postings. The chronological assignment of a number for the calculation of charges is based on the day of posting. Charges shall be due upon receipt of the invoice. Invoices must be settled within 7 days from the day of posting (service provision date). Charges will generally be collected by SEPA core direct debit. Legal requirements such as obtaining mandates and pre-notification (PRE-notification period) of a direct debit are taken into account. Invoices for daily newspapers are produced once a week based on the available accounting documents (posting lists and sample copies of the main issues and sub-issues appearing that day) for the previous week. Accounting documents that are received late are also invoiced on the day of receipt.

POSTVERTRIEBSSTÜCK Daily titles

Frequency of publication is more than once a week. At least 20 newspaper issue numbers have been posted per quarter.

** PREMIUMADRESS is a contractual product. Labeling the shipment accordingly means that an order is placed for chargeable services to be provided.

How is the error rate calculated?

If, for example, you send 1 million items per ZKZ (press product ID) a year and receive 4,000 address notifications for this ZKZ per year, the error rate is calculated as follows: $4,000/1 \text{ million} \times 100 = 0.4\%$.

Billing period

The charges are calculated for each ZKZ (press product ID) in accordance with the price list for the period from Jan. 1 to Dec. 31 each year. They are due on 1 February of the following year.
